

WHY EVAVO

for SPA PLANNING, ENGINEERING EQUIPMENT AND EXECUTION

From our extensive experience in SPA be it the largest Spa(73 Acres Hilton Shillim) in Asia or 8000 Sq ft Spa La Vie by Loccitane or be it a 1000 sq ft Spa, Svasti Spa - in each project we leverage our in depth understanding of SPA Guest Flow, ROI for Spa Layout, MEP Services planning. Thereby giving you not just great equipment but a Functional SPA delivering a WOW! Guest Experience which translates to repeat business.

We would also like to enumerate our strengths vis a vis other vendors you are considering:

NON MONETARY BENEFIT that comes with your Equipment order

PRE INSTALL

1. Unlike other vendors, we understand spa guest experience (flow,guest journey, guest pain points, etc.)
2. Unlike other vendors, we provide SPA Specific MEP inputs (Civil/Architecture, HVAC, Plumbing, Electrical , Finish specs etc) which not only provide for a BETEER guest experience but a cost optimized facility and lower Maintenance costs.
3. Unlike other vendors, we will not be just send technicians but provide detailed MEP specs and pre project Workshop(for large projects), customized MEP guidance to your team

SUMMARY: As a project owner/designer you will appreciate the above CRITICAL inputs in monetary value alone will far outweigh any cost or other benefit competitor is offering.

INSTALL n EQUIPMENT

1. Given our extensive partnership with leading manufacturers we can leverage Special prices and quicker delivery and faster support
2. We follow exacting workmanship for critical Spa Areas like Pool, Jacuzzi, Sauna and Steam comparable to the best International Standards
3. We will provide detailed SOP and Method statements of our workmanship
4. We use certified commercial Spa grade supporting material like insulation, grouting, tapes, switches, nails, dampners, valves etc
5. You will get detailed weekly status reports customized to your project needs

SUMMARY: you get international standard work at Indian prices

POST INSTALL BENEFITS

1. On Commissioning we will be doing a detailed demo and hands on training for your technical staff on best practices for operation and first level maintenance
2. We will do a hands on best practice of operation and optimal use for your SPA Operator staff
3. Provide precise operational dos and donts document to prevent down time and longevity of your equipment investment

SUMMARY: Your team is trained to ensure you get maximum value and uptime

If you have a hotel spa and leisure project and would like help and advice on anything from spa concept and feasibility, spa design and scheme development through to operations we are sure our team can support you.
